- Built to order in many sizes

Maximum Resilience

Our HD Rope Cargo nets are hand-woven with a 3-strand poly/poly blend rope to provide maximum strength and durability. These nets have also been used in the construction and landscaping industries for transportation of construction materials or yard debris by crane.

Taeron HD Rope cargo nets are perfect for high-abrasion applications and moving heavy loads with sharp edges. The durable materials and construction make them resistant to wear and tear, ensuring they can handle even the toughest cargo during underslung operations.

We can build HD Rope nets in nearly any working load limit or configuration imaginable, including Vehicle Lifting Nets for quick and easy transportation of wheeled vehicles by air. Contact us with your special requirements.
